SellSell / PickPic Platform Status Report

Date: 30 May 2026 – 11:46 PM

Executive Summary

The SellSell marketplace has successfully transitioned from a traditional classified platform into the foundation of an AI-powered conversational marketplace.

Major milestones completed during this phase include:

- AI-assisted seller flow deployment
- QR/Product Code infrastructure deployment
- Vehicle search intelligence improvements
- Arabic service-intent search locking
- Mercedes S400 ranking accuracy fix
- Image fallback and rendering fixes
- Full production E2E QA validation
- Production stabilization and regression testing

Production remains healthy and operational.

1. Search Intelligence Improvements

Mercedes S400 Search Accuracy

Problem

Queries such as:

- ابي مرسيدس اس 400
- s400 مرسيدس

returned:

- Audi
- Porsche
- Jeep
- ML400
- unrelated vehicles

Fix

Implemented:

- Script-aware tokenization
- Arabic model normalization
- Strict brand/model score locking
- S-Class family fallback ranking
- Qdrant reindex synchronization

Result

Current ranking:

1. Mercedes S400
2. Relevant S-Class fallback
3. No unrelated vehicles

Production verified.

Arabic Service Search Lock

Problem

Query:

"ابي كهر باني"

returned:

- Vehicles
- Plumbers
- Laundry services
- Unrelated categories

Fix

Implemented:

- Arabic service vocabulary expansion
- Service category locking
- SQL fallback protection
- Qdrant retry safeguards
- Service intent enforcement

Result

Current behavior:

- Services only
- No vehicles
- No electronics
- No property

If no electrician exists:

- Clean empty state shown

Production verified.

2. AI Seller Experience

AI-Assisted Seller Flow

Deployed:

<https://sell-sell.com/chat>

Features

- Image upload
- AI analysis framework
- AI title assistance
- AI insight chips
- Unified contact information
- Mobile-optimized draft flow
- Sticky publish button
- Listing quality suggestions

UX Improvements

Removed duplicate phone collection.

Seller now provides:

- Contact information
- Location
- Price
- Description
- Photos

Result:

Simpler and faster listing creation.

3. QR Code & Product Code Infrastructure

Implemented unique product identification system.

Features

Every listing now receives:

- Serial ID
- Product Code
- QR Code

Example:

SSC-KW-VEH-000001

Benefits

- Faster support
- QR sharing
- Direct lookup
- Future analytics
- Search precision improvements

Database migration completed successfully.

4. Image Infrastructure

Image Fallback Fix

Problem

Cards showed:

- Broken image icons
- Image unavailable messages
- Next.js optimizer failures

Fix

Implemented:

- Transparent PNG fallback
- URL normalization
- Legacy image support
- Optimizer-safe responses

Result

Clean rendering throughout marketplace.

Production verified.

5. Production QA Results

Comprehensive Playwright E2E validation completed.

Passed

Authentication

- Registration
- Login
- Session persistence
- Seller onboarding

Marketplace

- Search
- Listing pages
- Product pages
- QR pages

Search

- Mercedes S400
- Land Cruiser
- Prado
- Arabic search
- English search
- Service search

Infrastructure

- Docker containers healthy
- PostgreSQL healthy
- Redis healthy

- Qdrant healthy

6. Remaining Open Issues

High Priority

Issue 1

Service Worker intercepts API requests.

Symptoms:

- Failed to fetch
- Session check failures

Status:

Pending fix.

Issue 2

Text-only seller AI flow.

Example:

"I want to sell my Toyota Camry 2021 for 4500 KWD"

Current result:

- Title not extracted
- Price not extracted
- Condition not extracted

Status:

Pending fix.

Issue 3

RunPod Vision AI Verification

Goal:

Enable production AI image analysis for:

- Brand detection
- Model detection
- Color detection
- Year estimation

Status:

Pending verification.

Medium Priority

Issue 4

Language hydration shift.

Current behavior:

LTR → RTL layout shift during page load.

Status:

Pending optimization.

Issue 5

Guest refresh 401 console noise.

Status:

Low priority.

7. Repository & Infrastructure Status

Git:

- Branch: main
- Working tree clean

5/30/26 11:45:26 PM

- Synced with origin/main

Production:

- sell-sell.com operational
- Docker healthy
- App container healthy
- Worker container healthy

Latest verified deployment:

fac675005b822d64a0e9b94285b0d0c3ebc9bf42

Next Development Phase

AI Conversational Marketplace Intelligence

Focus areas:

1. Text-only AI listing extraction
2. RunPod Vision AI restoration
3. Automatic vehicle attribute extraction
4. Semantic image search
5. Location intelligence
6. Trust & fraud detection
7. Conversational shopping assistant

The platform has successfully moved beyond a standard classifieds marketplace and is now positioned to evolve into a fully AI-powered marketplace ecosystem.
