

PickPic / SellSell

Setup Guide

Step-by-step beginner-friendly guide to set up and run the project on Windows using Antigravity.

1. Introduction

This guide will help you install all required software, download the project, setup Docker and databases, and run the PickPic / SellSell application locally on your PC.

2. Required Software

Install the following software before continuing:

1. Git → <https://git-scm.com/download/win>
2. Node.js (LTS) → <https://nodejs.org>
3. Docker Desktop → <https://www.docker.com/products/docker-desktop/>
4. Antigravity → <https://antigravity.dev>

Important:

- During Docker installation enable WSL2 if asked.
- Restart your PC after Docker installation.

3. Verify Installations

Open PowerShell and run:

```
git --version
node -v
npm -v
docker --version
```

If all commands work without errors, continue to the next step.

4. Clone the Project

Open Antigravity terminal and run:

```
git clone https://github.com/shazej/pickpick-sls.git
```

```
cd pickpick-sls1
```

This downloads the project to your computer and enters the project folder.

5. Install Project Dependencies

Run the following command:

```
npm install
```

This installs all required packages for the project.

The installation may take several minutes.

6. Start Docker

Open Docker Desktop.

Wait until Docker says “Running”.

Then run:

```
docker compose up -d
```

This starts:

- PostgreSQL Database
- Qdrant Vector Database
- Application Services

7. Setup Database

Run the following commands one by one:

```
npx prisma generate  
npx prisma migrate deploy  
npm run db:seed
```

These commands prepare the database and seed initial data.

8. Run the Application

Run:

```
npm run dev
```

Then open:

```
http://localhost:3000
```

If successful, the application should load in the browser.

9. Common Problems

If you get errors:

- Restart Docker Desktop
- Restart your PC
- Re-run npm install
- Make sure internet connection is stable

If still not working:

Take a screenshot and send it for help.

10. Beginner Rules

- Do not panic if errors happen.
- Ask questions whenever confused.
- Never delete random files.
- Learn step by step.
- Always take screenshots of errors.
