1. Executive Summary

- **Overall traditional marketplace completeness %**: ~60%
- **What is strongest**: The AI and Discovery layers. The `main` branch has heavily invested in AI-first flows: Qdrant semantic search, RunPod voice transcription, conversational seller onboarding, and AI product validation. The database schema is remarkably comprehensive and anticipates enterprise-level scaling (roles, monetization, moderation, geo-location).
- **What is weakest**: Order fulfillment, buyer-seller messaging, and payments. Traditional e-commerce flows (Cart, Checkout, Shipping integration, Escrow, Escrow/Wallet payouts) are essentially nonexistent beyond database stubs. Real-time buyer-seller messaging exists but is isolated in an unmerged branch.
- **Biggest production blockers**: The lack of a merged traditional buyer-seller chat in `main`. If a user finds a product, the primary flow to finalize a transaction with the seller relies on `Inquiries` (form submissions/WhatsApp) rather than an integrated real-time chat, unless the `feature/product-page` branch is merged.

2. Branch Audit Summary

branch name	latest commit	relevant marketplace features found	should merge / ignore / inspect more
`main`	`35a53c9`	AI chat flow, Qdrant search, RunPod audio, seller drafts, Auth	N/A (Current Head)

`origin/feature/product-page`	`ec8a680`	Real buyer-seller messaging system, enhanced PDP API, related products API	****Merge**** (Resolves missing chat)
`origin/feature/mobile-app`	`cc33b51`	iOS native app code, mobile AI chat, UI themes (builds on `product-page`)	****Merge**** / Inspect for conflicts
`origin/feat/marketplace-core-delivery`	`c2031e1`	Structured multi-step Sell Form (non-AI fallback), S3 uploads	****Inspect more**** (Useful if AI fallback is needed)
`origin/feature/sell-sell-marketing-site`	`5d3f60b`	Bilingual marketing site / landing page	****Merge****

3. Feature Coverage Matrix

module	feature	status	evidence files/routes	notes
A. User Accounts	sign up / login / logout	✅ Complete	`src/app/api/auth/login`, `register`, `logout`	Active Firebase auth.
A. User Accounts	password reset	✅ Complete	`src/app/api/auth/reset-password`	
A. User Accounts	OTP login	🟡 Partial	`src/app/(auth)/otp-login`	Legacy OTP was refactored out in favor of Firebase per commit logs.
A. User Accounts	email/phone verification	✅ Complete	`api/auth/verify`, `Prisma: User.isVerified`	
A. User Accounts	buyer/seller profile	✅ Complete	`api/profile`, `api/seller/profile`	
A. User Accounts	user settings / roles	✅ Complete	`api/me`, `api/admin`, `Prisma: Role`	
A. User Accounts	saved addresses	🔴 Missing	`Prisma: User`	Only `city`/`area` exist. No address book model.
B. Seller Functionality	seller dashboard	✅ Complete	`src/app/(seller)`	
B. Seller Functionality	create/edit listing	✅ Complete	`api/products`, `Prisma: Product`	Focused heavily on AI draft generation.
B. Seller Functionality	delete/archive listing	🟡 Partial	`api/products`	Handled via `ProductStatus.archived`.
B. Seller Functionality	image / logo upload	✅ Complete	`api/upload`, `Prisma: Seller.logo`	Logo upload added in `4054478`.
B. Seller Functionality	product fields / status	✅ Complete	`Prisma: Product`	Full schema support for conditions, etc.
B. Seller Functionality	listing draft card	✅ Complete	`src/components/chat/seller-chat-dialog.tsx`	Instant seller flow.
B. Seller Functionality	view inquiries	✅ Complete	`api/inquiries`, `Prisma: Inquiry`	
B. Seller Functionality	seller analytics / profile	✅ Complete	`api/analytics`, `Prisma: Seller`	
B. Seller Functionality	promoted listings	✅ Complete	`Prisma: ListingPromotion`	
C. Buyer Functionality	browse products	✅ Complete	`src/app/(marketplace)/explore`	
C. Buyer Functionality	product detail page	✅ Complete	`src/app/(marketplace)/product`	Enhanced API is in `feature/product-page`.
C. Buyer Functionality	category pages / search	✅ Complete	`src/app/(marketplace)/search`, `category`	

C. Buyer Functionality	filters / sorting	☒ Complete	`api/search`	
C. Buyer Functionality	wishlist/favorites	☒ Complete	`api/favorites`, `Prisma: Favorite`	Sidebar nav added in `f5e2bf9`.
C. Buyer Functionality	contact seller	☒ Complete	`api/inquiries`, `Prisma: ListingContactClick`	Support for WhatsApp/Call tracking.
C. Buyer Functionality	make offer	☐ Missing	N/A	No explicit offer model.
C. Buyer Functionality	report listing	☒ Complete	`api/reports`, `Prisma: Report`	
C. Buyer Functionality	compare products / recent	☐ Missing	N/A	
D. Listings / Products	category / attributes	☒ Complete	`Prisma: Category`, `ProductAttributeValue`	
D. Listings / Products	image gallery / price / loc	☒ Complete	`Prisma: ProductImage`, `Product`	
D. Listings / Products	view count / share listing	☒ Complete	`Prisma: Product.viewCount`	Share button added in `f5e2bf9`.
D. Listings / Products	related/similar listings	☐ Partial	`feature/product-page`	Merged in `cf05f20` but on a non-main branch.
E. Search & Discovery	keyword / category / filters	☒ Complete	`api/search`, `api/categories`	
E. Search & Discovery	semantic/vector & Qdrant	☒ Complete	`Prisma: qdrantPointId`, `api/search`	Heavily optimized in `main`.
E. Search & Discovery	featured / trending	☐ Partial	`Prisma: SearchTrend`	Schema exists, exposure unclear.
E. Search & Discovery	recommendations / saved	☐ Missing	N/A	
F. Messaging	buyer-seller chat	☐ Partial	`feature/product-page` branch	Missing on `main`.
F. Messaging	AI chat / history	☒ Complete	`api/chat`, `Prisma: ChatSession`	Core feature of `main`.
F. Messaging	inquiries / notifications	☒ Complete	`Prisma: Inquiry`, `Notification`	
F. Messaging	block user	☐ Missing	N/A	Can report, but not explicitly block.
G. Orders & Transactions	order creation / status	☐ Partial	`api/orders`, `Prisma: Order`	Basic draft model, no checkout flow.
G. Orders & Transactions	cart / checkout / tracking	☐ Missing	N/A	
H. Payments	payment gateway / history	☐ Partial	`Prisma: PaymentGateway`, `Transaction`	Models exist, but no real Stripe/PayPal integrations found.
H. Payments	wallet / commissions	☐ Partial	`Prisma: User.tokenBalance`	Used for PropertyNir.
H. Payments	escrow / payouts / refunds	☐ Missing	N/A	
I. Shipping / Delivery	pickup location	☐ Partial	`Prisma: Location`	
I. Shipping / Delivery	tracking / integration	☐ Missing	N/A	
J. Admin Panel	dashboard / reports / logs	☒ Complete	`src/app/(admin)`, `api/reports`	Includes `AuditLog` and metrics.
J. Admin Panel	moderation / approval	☒ Complete	`Prisma: Product.moderatedById`	
J. Admin Panel	packages / subscriptions	☒ Complete	`api/packages`, `Prisma: Package`	

| K. Moderation | AI validation / prohibited | Complete | `Prisma: ProhibitedKeyword` |
 AI rejects invalid images/categories. |
K. Moderation	verification badges	Complete	`Prisma: Seller.isVerified`	
K. Moderation	trust score / scam detect	Missing	N/A	
L. Reviews & Trust	seller ratings	Complete	`Prisma: Seller.rating`	
L. Reviews & Trust	product reviews	Partial	`api/reviews`, `Prisma: Review`	
L. Reviews & Trust	verified purchase / buyer	Missing	N/A	
M. Notifications	in-app / jobs	Complete	`api/notifications`, `Prisma: Notification`	
M. Notifications	email / SMS / push	Partial	`Prisma: NotificationJob`	No direct
push logic implemented.				
N. Marketing	featured / subscriptions	Complete	`api/featured`, `api/packages`	
N. Marketing	ads / coupons / referrals	Missing	N/A	
O. Support	contact form / tickets	Complete	`api/support`	
O. Support	FAQ / help center	Missing	N/A	Beta readiness legal pages exist.
P. Analytics	views / logs / metrics	Complete	`api/analytics`, `api/metrics`	
P. Analytics	revenue / conversion	Missing	N/A	
Q. AI / Voice	Ollama / image / whisper	Complete	`api/audio/transcribe`	Fully
 configured with RunPod on `main`. |

4. Current Main Branch Status

The `main` branch is highly specialized towards AI-driven interactions. It has successfully integrated semantic search (Qdrant), real-time AI product validation, dynamic conversational seller onboarding, and an externalized GPU infrastructure for voice (RunPod + faster-whisper). Traditional frontend UI features (Wishlist sidebar, share buttons, admin analytics) are present. However, it lacks a pure user-to-user chat interface.

5. Features Present Only in Other Branches

- `origin/feature/product-page`: Contains a "real buyer-seller messaging system" and a fully constructed Product Detail Page API (including `related products`).
- `origin/feat/marketplace-core-delivery`: Contains a non-AI multi-step structured Sell Form and AWS S3 integration.
- `origin/feature/mobile-app`: Contains the native iOS application shell and SwiftUI layouts.

6. Missing Traditional Marketplace Features (Prioritized)

1. **Real-time Buyer-Seller Chat** (Crucial for conversions; currently trapped in `feature/product-page`).
2. **Checkout & Cart Flow** (If the platform intends to handle payments directly rather than just acting as a classifieds board).
3. **Payment Gateway Integration** (Stripe/PayPal missing).
4. **Shipping / Courier Integrations**.
5. **Trust Mechanics** (Verified purchase badges, buyer ratings, explicit block user buttons).

7. Broken or Risky Existing Features

- **Legacy OTP Login**: The commit history implies OTP was refactored out in favor of Firebase, but OTP files still exist in the `auth` directory. This could cause routing/API conflicts if not fully deprecated.
- **Order State Machine**: The `Order` and `Transaction` models exist, but without a dedicated checkout flow, they are risky to depend on and likely dead code at the moment.

8. AI/Voice Marketplace Status

- **Production Ready**: ☒ Yes.
- The `main` branch has successfully transitioned from local transcription (`docker-compose`) to a scalable RunPod API (`/api/audio/transcribe`), effectively unblocking production deployment. Qdrant logic has been hardened with retry mechanisms.

9. Recommended Merge Plan

1. Ensure `main` is stable.
2. Merge `origin/feature/product-page` into `main` to capture the buyer-seller messaging logic and related products API.
3. Merge `origin/feature/mobile-app` after the product page changes, as it builds on the same foundation.
4. Cherry-pick the marketing site routes from `origin/feature/sell-sell-marketing-site`.

10. Recommended Development Roadmap

- **Immediate Fixes**: Execute the merge plan above to connect buyers and sellers natively via chat. Deprecate legacy OTP frontend components completely to avoid confusion.
- **Short-term marketplace completion**: Implement user blocking, saved searches, and related/similar product carousels (using the API from the product-page branch).
- **Medium-term monetization/admin**: Build out the real payment processor integration (Stripe) to bring the `Package` and `SellerSubscription` models to life.
- **Production launch checklist**: Verify Firebase production credentials, ensure Qdrant cloud is scaled, configure RunPod concurrency limits, and perform an E2E test on buyer-to-seller chat messaging.

3. Feature Coverage Matrix

module	feature	status	evidence files/routes	notes
A. User Accounts	sign up / login / logout	✅ Complete	`src/app/api/auth/login`, `register`, `logout`	Active Firebase auth.
A. User Accounts	password reset	✅ Complete	`src/app/api/auth/reset-password`	
A. User Accounts	OTP login	🟡 Partial	`src/app/(auth)/otp-login`	Legacy OTP was refactored out in favor of Firebase per commit logs.
A. User Accounts	email/phone verification	✅ Complete	`api/auth/verify`, `Prisma: User.isVerified`	
A. User Accounts	buyer/seller profile	✅ Complete	`api/profile`, `api/seller/profile`	
A. User Accounts	user settings / roles	✅ Complete	`api/me`, `api/admin`, `Prisma: Role`	
A. User Accounts	saved addresses	🔴 Missing	`Prisma: User`	Only `city`/`area` exist. No address book model.
B. Seller Functionality	seller dashboard	✅ Complete	`src/app/(seller)`	
B. Seller Functionality	create/edit listing	✅ Complete	`api/products`, `Prisma: Product`	Focused heavily on AI draft generation.
B. Seller Functionality	delete/archive listing	🟡 Partial	`api/products`	Handled via `ProductStatus.archived`.
B. Seller Functionality	image / logo upload	✅ Complete	`api/upload`, `Prisma: Seller.logo`	Logo upload added in `4054478`.
B. Seller Functionality	product fields / status	✅ Complete	`Prisma: Product`	Full schema support for conditions, etc.
B. Seller Functionality	listing draft card	✅ Complete	`src/components/chat/seller-chat-dialog.tsx`	Instant seller flow.
B. Seller Functionality	view inquiries	✅ Complete	`api/inquiries`, `Prisma: Inquiry`	
B. Seller Functionality	seller analytics / profile	✅ Complete	`api/analytics`, `Prisma: Seller`	
B. Seller Functionality	promoted listings	✅ Complete	`Prisma: ListingPromotion`	
C. Buyer Functionality	browse products	✅ Complete	`src/app/(marketplace)/explore`	
C. Buyer Functionality	product detail page	✅ Complete	`src/app/(marketplace)/product`	Enhanced API is in `feature/product-page`.
C. Buyer Functionality	category pages / search	✅ Complete	`src/app/(marketplace)/search`, `category`	

C. Buyer Functionality	filters / sorting	Complete	`api/search`	
C. Buyer Functionality	wishlist/favorites	Complete	`api/favorites`, `Prisma: Favorite`	Sidebar nav added in `f5e2bf9`.
C. Buyer Functionality	contact seller	Complete	`api/inquiries`, `Prisma: ListingContactClick`	Support for WhatsApp/Call tracking.
C. Buyer Functionality	make offer	Missing	N/A	No explicit offer model.
C. Buyer Functionality	report listing	Complete	`api/reports`, `Prisma: Report`	
C. Buyer Functionality	compare products / recent	Missing	N/A	
D. Listings / Products	category / attributes	Complete	`Prisma: Category`, `ProductAttributeValue`	
D. Listings / Products	image gallery / price / loc	Complete	`Prisma: ProductImage`, `Product`	
D. Listings / Products	view count / share listing	Complete	`Prisma: Product.viewCount`	Share button added in `f5e2bf9`.
D. Listings / Products	related/similar listings	Partial	`feature/product-page`	Merged in `cf05f20` but on a non-main branch.
E. Search & Discovery	keyword / category / filters	Complete	`api/search`, `api/categories`	
E. Search & Discovery	semantic/vector & Qdrant	Complete	`Prisma: qdrantPointId`, `api/search`	Heavily optimized in `main`.
E. Search & Discovery	featured / trending	Partial	`Prisma: SearchTrend`	Schema exists, exposure unclear.
E. Search & Discovery	recommendations / saved	Missing	N/A	
F. Messaging	buyer-seller chat	Partial	`feature/product-page` branch	Missing on `main`.
F. Messaging	AI chat / history	Complete	`api/chat`, `Prisma: ChatSession`	Core feature of `main`.
F. Messaging	inquiries / notifications	Complete	`Prisma: Inquiry`, `Notification`	
F. Messaging	block user	Missing	N/A	Can report, but not explicitly block.
G. Orders & Transactions	order creation / status	Partial	`api/orders`, `Prisma: Order`	Basic draft model, no checkout flow.
G. Orders & Transactions	cart / checkout / tracking	Missing	N/A	
H. Payments	payment gateway / history	Partial	`Prisma: PaymentGateway`, `Transaction`	Models exist, but no real Stripe/PayPal integrations found.
H. Payments	wallet / commissions	Partial	`Prisma: User.tokenBalance`	Used for PropertyNir.
H. Payments	escrow / payouts / refunds	Missing	N/A	
I. Shipping / Delivery	pickup location	Partial	`Prisma: Location`	
I. Shipping / Delivery	tracking / integration	Missing	N/A	
J. Admin Panel	dashboard / reports / logs	Complete	`src/app/(admin)`, `api/reports`	Includes `AuditLog` and metrics.
J. Admin Panel	moderation / approval	Complete	`Prisma: Product.moderatedById`	
J. Admin Panel	packages / subscriptions	Complete	`api/packages`, `Prisma: Package`	

| K. Moderation | AI validation / prohibited | Complete | `Prisma: ProhibitedKeyword` |
 AI rejects invalid images/categories. |
K. Moderation	verification badges	Complete	`Prisma: Seller.isVerified`	
K. Moderation	trust score / scam detect	Missing	N/A	
L. Reviews & Trust	seller ratings	Complete	`Prisma: Seller.rating`	
L. Reviews & Trust	product reviews	Partial	`api/reviews`, `Prisma: Review`	
L. Reviews & Trust	verified purchase / buyer	Missing	N/A	
M. Notifications	in-app / jobs	Complete	`api/notifications`, `Prisma: Notification`	
M. Notifications	email / SMS / push	Partial	`Prisma: NotificationJob`	No direct
push logic implemented.				
N. Marketing	featured / subscriptions	Complete	`api/featured`, `api/packages`	
N. Marketing	ads / coupons / referrals	Missing	N/A	
O. Support	contact form / tickets	Complete	`api/support`	
O. Support	FAQ / help center	Missing	N/A	Beta readiness legal pages exist.
P. Analytics	views / logs / metrics	Complete	`api/analytics`, `api/metrics`	
P. Analytics	revenue / conversion	Missing	N/A	
Q. AI / Voice	Ollama / image / whisper	Complete	`api/audio/transcribe`	Fully
 configured with RunPod on `main`. |

4. Current Main Branch Status

The `main` branch is highly specialized towards AI-driven interactions. It has successfully integrated semantic search (Qdrant), real-time AI product validation, dynamic conversational seller onboarding, and an externalized GPU infrastructure for voice (RunPod + faster-whisper). Traditional frontend UI features (Wishlist sidebar, share buttons, admin analytics) are present. However, it lacks a pure user-to-user chat interface.

5. Features Present Only in Other Branches

- `origin/feature/product-page`: Contains a "real buyer-seller messaging system" and a fully constructed Product Detail Page API (including `related products`).
- `origin/feat/marketplace-core-delivery`: Contains a non-AI multi-step structured Sell Form and AWS S3 integration.
- `origin/feature/mobile-app`: Contains the native iOS application shell and SwiftUI layouts.

6. Missing Traditional Marketplace Features (Prioritized)

1. **Real-time Buyer-Seller Chat** (Crucial for conversions; currently trapped in `feature/product-page`).
2. **Checkout & Cart Flow** (If the platform intends to handle payments directly rather than just acting as a classifieds board).
3. **Payment Gateway Integration** (Stripe/PayPal missing).
4. **Shipping / Courier Integrations**.
5. **Trust Mechanics** (Verified purchase badges, buyer ratings, explicit block user buttons).

7. Broken or Risky Existing Features

- **Legacy OTP Login**: The commit history implies OTP was refactored out in favor of Firebase, but OTP files still exist in the `auth` directory. This could cause routing/API conflicts if not fully deprecated.
- **Order State Machine**: The `Order` and `Transaction` models exist, but without a dedicated checkout flow, they are risky to depend on and likely dead code at the moment.

8. AI/Voice Marketplace Status

- **Production Ready**: ☒ Yes.
- The `main` branch has successfully transitioned from local transcription (`docker-compose`) to a scalable RunPod API (`/api/audio/transcribe`), effectively unblocking production deployment. Qdrant logic has been hardened with retry mechanisms.

9. Recommended Merge Plan

1. Ensure `main` is stable.
2. Merge `origin/feature/product-page` into `main` to capture the buyer-seller messaging logic and related products API.
3. Merge `origin/feature/mobile-app` after the product page changes, as it builds on the same foundation.
4. Cherry-pick the marketing site routes from `origin/feature/sell-sell-marketing-site`.

10. Recommended Development Roadmap

- **Immediate Fixes**: Execute the merge plan above to connect buyers and sellers natively via chat. Deprecate legacy OTP frontend components completely to avoid confusion.
- **Short-term marketplace completion**: Implement user blocking, saved searches, and related/similar product carousels (using the API from the product-page branch).
- **Medium-term monetization/admin**: Build out the real payment processor integration (Stripe) to bring the `Package` and `SellerSubscription` models to life.
- **Production launch checklist**: Verify Firebase production credentials, ensure Qdrant cloud is scaled, configure RunPod concurrency limits, and perform an E2E test on buyer-to-seller chat messaging.
