Application Routes

Here is a complete, categorized list of all the pages (routes) in your application based on your `page.tsx` files.

⚠ Warning: Route Conflicts Detected!

Just like the `/seller` conflict we found earlier, you currently have **two** pages resolving to the root URL `/`:

- `src/app/page.tsx`
- `src/app/(marketplace)/page.tsx`

You will need to remove one of these, otherwise Next.js will crash with a 500 error when users visit your homepage.
